Experience

Knowtworthy - *Software Developer and Co-Founder - (Sep. 2017 - Present)*

- Worked with my co-founders to engineer our meetings productivity tool from mockups to MVP that we tested with over 100 signups.
- Built the backend API using **Node.JS** & **MongoDB** and the streaming server using **Golang** & **AWS SQS**.
- Setup hosting on **AWS** & **Kubernetes** and the metrics/logging pipeline on **Elasticsearch** & **Kibana**.

BMO - *Software Developer Intern - (May 2019 - Sep. 2019)*

- Built UI Mockups of the Minimum Viable Product(MVP) for a new BI tool. Implemented a standard on how to build UIs for the Web App to ensure that work completed by different teammates was identical.
- Used **Javascript**, **JQuery**, **HTML**, and **CSS** to build mockup UIs and the MVP.
- Built a regression analysis tool in Python for the BAs on my team. Collectively, the tool reduced 20 hours of work per week for the BAs.

BDM Trucks - *Freelance Web Developer - (Sep. 2017 - Nov. 2017)*

- Updated their hosting and DNS records to lower IT costs.
- Rebuilt their website with a modern design and mobile view to help customers access the page on the go.
- Used **Bootstrap 4**, **HTML**, and **CSS** to build the website.

SBIRT - *Freelance Software Developer - (Oct. 2015 - Dec. 2016)*

- Built an **Android** and **iOS** app to help researchers track drug abuse in their local area using data submitted from clinicians.
- Built an API backend using **App Engine** and **MySQL** to collect the data from the apps.
